CHINESE MUSTARD

Chinese mustard (*Brassica juncea*) or in Cantonese -Kai Choi, also known as green mustard cabbage. Cabbage (*Brassica oleracea*) is the same family species with Chinese mustard – brassica. *Brassica juncea* belongs to the *Cruciferae* (*Brassicaceae*) plant family, commonly known as the mustard family.

The name is derived from the shape of the flowers that have four diagonally opposed petals in the form of a cross. *Brassica juncea* has pale green foliage, with a few hairs on the first leaves and leaf blades that terminate well up the petiole. Mature *Brassica juncea* plants grow to a height of one to two meters. The lower leaves are deeply lobed, while the upper leaves are narrow and entire.

Cabbage

Cabbage (*Brassica oleracea*), vegetable and fodder plant the various forms of which are said to have been developed by long cultivation from the wild, or sea, cabbage (*Brassica*

- i. loose or open foliage- (e.g. kale and collards)
- ii. Leaves folded into compact heads leaves (large terminal heads)—(e.g., common cabbage and savoy cabbage)
- iii. Small axillary heads—(e.g., Brussels sprouts);

(2) **Flowers:** flower much thickened and modified - (e.g. cauliflower and heading broccoli);

(3) **Stem:** stem much expanded to a bulbous structure- (e.g. kohlrabi).
